

JIT sXGP/uLTE partnership program

Business entry into Japan for sXGP/uLTE solutions

What is the JIT sXGP partnership program?

The JIT sXGP/uLTE partnership program is a service introduction approach & delivery method to offer mobile/enterprise solutions to the sXGP/uLTE market in Japan.

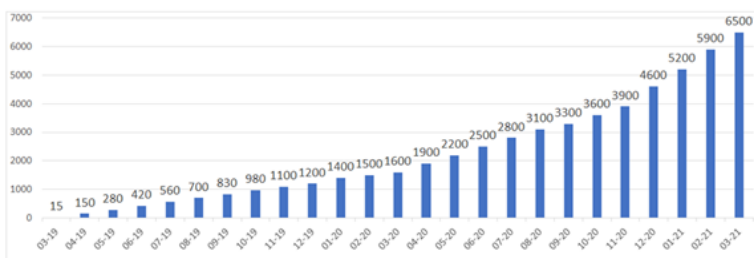

JIT is working with multiple solution vendors to provide their services & products to enterprises that are using uLTE ranging from eNB to EPC to enterprise services such as device management, iPBX, IOT, UE life cycle management and many more.

Example program solutions

- 4G & 5G EPC core
- eNB / small cell
- Cloud iPBX
- MDM & Virtual Networks & Data security
- UE Life Cycle management
- eSIM Solutions
- Policy Control / PCRF
- ETWS / LTE Broadcast
- SMS & RCS

The business opportunity

sXGP/uLTE is expected to be a growth market from April 2019 to 2023. Thousands of Enterprises, Hospitals, Industries, Institutions are all looking for on premise and/or cloud solutions to improve / fully utilize their private 4G & 5G networks for Staff, IOT, M2M, Data Security, reduced costs etc.

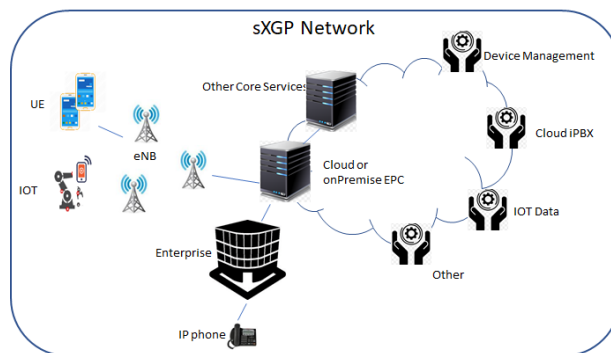

Enterprise migration forecast Apr 2019 to Feb 2021

sXGP market Information

- Existing private PHS (Dect like) will be an initial driver for uLTE. There are 55,000+ enterprises with 5,000,000+ users that will migrate from PHS to uLTE between 2019 and 2023.
- Enterprises looking for alternatives to MNO/WiFi for their IOT / M2M networks are expected to continue to grow the market beyond 2023.

The challenge for enterprises using sXGP/uLTE

The target users of uLTE are enterprises, hospitals, heavy industry and many more, none of whom possess traditional mobile know how. In fact, they need solution integrators to deliver cost efficient mobile technologies in order to rapidly develop their enterprise networks.

The challenge for solution providers

Access to the enterprises wishing to use sXGP/uLTE is not so easy. The traditional integrators and business entry services into Japan do not yet have the channels needed to exploit these emerging enterprise market opportunities.

Why JIT?

The JIT team have been heavily involved in sXGP/uLTE space in Japan since 2016 and collaborate closely with all of the main participants (System Integrators, PBX Vendors, MVNO, resellers etc).

We have created a sandbox environment in our Office in Tokyo to help with integration for applications & platforms for the sXGP/uLTE environment, in fact JIT is operating the world 1st uLTE sXGP network with cloud PBX integration in our office in Japan.

JIT have been engaged in market entry services into Japan for 10+ years. In addition, JIT provide end to end delivery services & develop our own bespoke software solutions for a range of services from prepaid, payments, SMS gateways, LTE EIR and more.
